

Aqurance, one of the fastest growing companies in Life Sciences' services provision, seeks to empower young and vigorous students and give them the opportunity to make their first steps in corporate and business landscape. We're keen to foster new ideas and talented people.

Aqurance collaborates with academic institutions in order to enable students and give them the opportunity to work on real projects and on cutting-edge technology.

More than 65% of our interns choose to continue working in the company and to develop further their skills and expertise.

This letter aims to inform that the company is expanding its internship program in additional business departments with new internship job positions. The internships we offer in our office in Athens are:

- **graphic designers**
- **webdevelopers**
- **computer engineers**
